DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Plant (US 5,649,587).

Plant discloses a fluid cooling device as a structural unit with a drive motor (72) driving a rotating fan wheel (14) in a fan housing and at least one fluid can be conveyed from a reservoir tank into a hydraulic working circuit which heats the fluid in operation and which leads to an assigned heat exchanger from which the fluid returns cooled to the reservoir tank, the parts of the reservoir tank at least partially enclose the fan wheel and in this way form the fan housing (Fig. 1), a drive motor driving a fluid pump, the tank forming a hollow collar in which the fan wheel is rotatably mounted (Fig. 1), the hollow collar having first and second opening cross sections (Fig. 1), the tank having at least two tank chambers (Fig. 5), the tanks having openings (40, 42).

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/559,927

Art Unit: 3744

Page 3

- 4. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Plant (US 5,649,587) in view of Albright et al (6,871,697). Plant discloses a fluid cooling device having the claimed structure with the exception of the opening cross section being larger adjacent the heat exchanger and the material of the housing. However, Albright et al discloses making such housings of plastic and providing a larger opening cross section adjacent the heat exchanger. It would have been obvious in view of Albright et al to make the housing of Plant of plastic, since Plant teaches forming the housing by blow molding and plastic is a suitable material for blow molding, and to provide a larger opening cross section adjacent the heat exchanger, the motivation being to provide smoother air flow.
- 5. Claim 1 is objected to because of the following informalities: The last line of claim 1 includes the term "preferably". It is unclear whether the information following this term is intended to be a limitation of the claim or whether it should be disregarded. Appropriate correction is required.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tangue et al, Rest et al, Roschinski, Nakamura, Moltzheim et al, Lee et al, and Hoshino are cited to show fan housings including fluid tanks.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
